The Company and Its Business

Advanced Packaging Technology (M) Bhd was incorporated in Malaysia under the Companies Act, 1965 on 31 March 1982 as a private limited company under the name of Goyo Corporation (M) Sdn. Bhd. The Company subsequently changed its name to Advanced Packaging Technology (M) Sdn Bhd on 09 June 1982 and was converted to a public company on 27 May 1993. It was listed on the Second Board (now known as Main Market after the merger of the Main Board and Second Board on 03 August 2009) of the Bursa Malaysia Securities Berhad on 27 May 1994.

An ISO 9001 certified company, Advanced Packaging Technology (M) Bhd is principally engaged in the manufacturing and distribution of flexible packaging materials. The Company commenced operations in April 1985 at its present location at the Bangi Industrial Estate, Selangor Darul Ehsan. Its office, factory and warehouse is sited on a 8,903 square meter ("sq m") 99-year leasehold land.

The Company produces high-quality flexible packaging materials catering to a wide cross-section of industries in both the local and overseas markets such as snack foods, instant noodles, sweets and confectionery, liquid condiments, frozen foods, spices, beverages, medical / surgical products and pharmaceuticals, among others. Our range of flexible packaging material comprises both single and multi-layers that carry appealing designs. Through close consultation with clients, we tailor-make our products according to their precise specification and design in both roll and pouch form.

Flexible packaging materials are generally made of a composite of various base films, papers or foil which are laminated so that the resultant laminates have more enhanced properties than its original substrates. The basic materials used include oriented polypropylene (OPP) film, cellulosic film, polyester film, nylon film, aluminium foil, metallised films, specialty films, linear low density polyethylene (LLDPE) film, poster paper, polyethylene and polypropylene resin.

Efficient packaging is a must for any product in this modern era. Without it, the brand image and integrity, as well as the quality built into the product during manufacturing and marketing, will be lost when it reaches the consumer. Correct packaging is the principal way of ensuring safe delivery of the product to the end-user in good condition at an economic cost. At Advanced Packaging Technology (M) Bhd, we use our specialised knowledge and skills, as well as specific machinery and facilities to deliver excellence in quality and service to each client.

In the pursuit of our commitment in quality, the Company's Quality Management System was first assessed by Zurich Certification Limited, United Kingdom and found to comply with BS EN ISO 9002:1994 standard and the certificate of registration was issued on 8 December 2000. The Quality Management System (QMS) was subsequently upgraded and certified to BS EN ISO 9001:2000 on 21 December 2003 by Independent European Certification Limited, United Kingdom. It was recertified to BS EN ISO 9001:2008 and ISO 9001:2008 by Independent European Certification (M) Sdn Bhd (IEC) on 12 January 2010 and 20 December 2012 respectively. The QMS was again upgraded and assessed by IEC and certified to ISO 9001:2015 on 15 August 2018. The certification scope covers "Design, Manufacturing and Supply of Flexible Packaging Materials and Blown Film".

Advanced Packaging Technology (M) Bhd currently also produces linear low density polyethylene (LLDPE) film for its internal consumption and external sales.
